Profile

Greetings! I'm Harshit Gupta, a proactive Full Stack Web Developer on a journey to transform ideas into captivating digital experiences. With an expertise honed in the MEAN/MERN stack, I thrive on tackling intricate problems and translating them into elegant solutions. My journey began with freelance website creation, cultivating my knack for intuitive designs and optimal functionality.

As a dedicated problem solver and tech enthusiast, I'm committed to pushing the boundaries of innovation. My foundation in MEAN/MERN, along with skills in HTML, CSS, JavaScript, and API development, empowers me to craft engaging user interactions. Joining your team, I'm eager to contribute my expertise, collaborate seamlessly, and drive projects to excellence. Let's build the future of the web together.

Skills

Client-Side

- HTML5
- CSS3
- React JS
- Javascript/Typescript
- Bootstrap
- Material UI

Server-Side

- Mongo DB
- NodeJS
- Express JS
- PostgreSQL
- Mysql
- Sequelize
- NestJS
- TypeORM

Libraries & Tools

- Vscode
- Git/Github
- Swagger UI
- Docker
- Containers
- Cloud Technologies

Professional Experience

Full Stack Intern, Urbanaac Infrastructures Pvt. Ltd.

06/2022 – 11/2022 | Ahmedabad, India

We have been working on a website that will track all the data that is occurring within the company. With the aid of this website, data organization has become quite simple. In order to maintain track of the data, we have created numerous working pages for the authorized users and employees in accordance with their tasks. An administrator has access to all of these pages.

MEAN STACK Trainee Engineer, Simform Solutions

02/2023 – present | Ahmedabad, India

I've thrived in my role through the creation and maintenance of dynamic full-stack web applications using the MEAN stack. My specialization lies in crafting seamless navigation routes within Node.js and implementing robust authentication and authorization mechanisms. By actively engaging in Agile processes, which include conducting code reviews and sprint planning, I consistently deliver top-notch code quality.

My skill set which I used during this position covers a wide spectrum, including expertise in HTML, CSS, JavaScript, Git, Node.js, various databases (SQL and NoSQL), React, TypeScript, Docker, and API development using NestJS and Swagger. Moreover, I've successfully completed projects that serve as a testament to my capabilities.

Projects

Natours, *Udemy Bootcamp Project*

The Natours project, a culmination of our Node.js bootcamp, is a nature tour booking platform. Powered by Node.js and Express.js, it employs Pug for dynamic content and MongoDB with Mongoose for data storage. JSON Web Tokens ensure secure user communication. Integrating third-party APIs enriches the user experience. This project highlights the practical application of modern web technologies and offers seamless nature travel exploration.

Authentication System

I developed a robust user registration and login mechanism, prioritizing security. Utilizing technologies like Express and Sequelize, I implemented multi-factor authentication and securely stored sensitive user data. The project incorporated concepts like JWT (JSON Web Tokens) for secure authorization, protecting user information during interactions.

Product Review System

I engineered a dynamic platform enabling users to submit reviews for products. Leveraging Sequelize ORM with MySQL, I designed a seamless data flow for review submissions and retrievals. Rigorous testing was implemented to ensure system reliability, including scenarios like concurrent user interactions and data integrity. The result was an efficient, user-friendly system allowing authentic and valuable product reviews.

Wellnessutra

As a freelancer I've successfully developed a website for a Yoga Instructor.

Interests

Chess (*Play chess once a weekend with social tournament setting*),

Listening to music (*Listening to music lowers stress and elevates my mood. It strengthens learning and memory abilities too.*),

Travel (*Traveling can prove you're not afraid of stepping outside your comfort zone and learning new things.*),

Teaching (*Teaching is more of a hobby than a true career for me because I've been a home tutor for about 3 years and I've taught more than 40 students. As a student myself I find it interesting to teach others and also it is the best way to learn and earn.*)

Education

B.Tech(COMPUTER ENGINEERING),
Silver Oak College Of Engineering And Technology
present | Ahmedabad, India

Certificates

- Completed the Frontend Dev With React Js with DevTown. 
- Completed the Server Authentication using Express and NodeJS. 

Languages

English | Hindi | Gujarati

Declaration

I do hereby declare that all the details mentioned above are accurate to the best of my knowledge and confidence.
