SKILLS

HTML

CSS

Javascript

DSA

JAVA

React

Bootstrap

Express.js

MySQL

Php

Laravel

Nodejs

PERSONAL PROJECTS

Album List | React

- This project is a web application built with React.js that allows users to manage and view a list of albums.
- Users can add new albums, delete and view details of each album.
- Technologies used: Reactjs, Redux toolkit, React-router-dom.
- Github Link: <https://github.com/SIDDH5320/ReactAlbumList>

Employee Review System

- An application that allows employees to submit feedback towards each other's performance.
- Has Admin and Employee panel where Admin can assign tasks and review employees. Add employees and has a whole list.
- Technologies used: Nodejs, MongoDB, Express.js
- Github Link: <https://github.com/SIDDH5320/EmployeeReviewSystemCn> 

Placement Cell

- The main goal was to create an interface where employees could input data into the database and then download it in CSV format.
- It has the authentication of the registered students, gives the Job list of React developers from the API, can schedule job interviews and we can download whole data in CSV format.
- Technologies used: Nodejs, MongoDB, Express.js.
- Github Link: <https://github.com/SIDDH5320/CareercampPlacementcell.github.io> 

Habit Tracker | React

- User can add multiple habits to their list, and can check their weekly status of habit (done, not done, pending).
- Technologies used: Reactjs, Tailwindcss, Redux toolkit, React-router-dom.
- Github Link : <https://github.com/SIDDH5320/HabitTracker>
